Approval of subcontracted processing

Dear Sir or Madam,

We herewith confirm that **Polizois Sarantos & Co LTD** is approved as **subcontractor for bottling of olive oil**.

Please kindly note the following conditions:

1. Pest control is done by a contractor, Vertery Services. Please make a contract to ensure that the measures used for pest control conform to the Demeter standards. Synthetic chemical agents are not allowed in storage and work areas of the processing business, nor around the buildings or on the property.
2. At no time synthetic chemical agents are allowed as a routine treatment for pest control in the sense of prevention. Use permitted means only e.g. mechanical, physical or thermic measures as long as there is no other option in Greece.
3. In the event of legally required use of not permitted measures in acute cases, you have to inform Demeter-International promptly. The measure must be detailed (location, date, active agent, pests, products in storage, planned measures/analysis) and justified by the pest control agent.
4. **As a result of the use of alpha-cypermethrin on 19th October 2017, the product must be tested for residues of these agents prior to sales. Any positive residue must immediately be communicated to Demeter-International. All test results must be presented during next Demeter-inspection.**

Please comply further with conditions of the organic inspection report. We fully support those conditions and require implementation.

The approval is valid until the next inspection, but not later than December 31, 2018:

With best regards

Demeter-International e. V.
